

Monday, 1st June

It's June already! Welcome to week 11 of schooling from home.

Let's check the solutions from Wednesday last week:

- Učb. Str. 75/4A : 2 Have, haven't 3 Has, has 4 Have, haven't 5 Have, have 6 Has, has
- Učb. Str. 75/ 5: - I don't understand how this works. - Are there any instructions with it? - Yes, I think so. But I can't find them. - Did you leave them in the shop?- No, I don't think so. They might be in the box somewhere.
- DZ str. 52/ 2: 2 F 3 F 4 T 5 ? 6 T 7 ? 8 F 9 F
- DZ str. 52/ 3: 2 What have they bought? 3 How many people have joined Park Rescue? 4 How much (money) have they raised? 5 Have they made a skateboarding area? 6 Has the café opened yet? 7 Has the park improved?
- DZ str. 52/ 4: 2 I think so. But you'll need to charge the battery. 3 I think so. She's getting better now. 4 I don't think so. They aren't great sports fans. 5 I think so. I saw them together a few days ago. 6 I don't think so. She's still in the kitchen.
- DZ str. 52/ 5: A 1 Selma 2 Matt 3 Jane 4 Nick 5 Kate B 1 has 2 Have, Yes, have, gone 3 Has, Yes, has 4 What has, computer 5 have 6 Has, No, hasn't, grandmother
- DZ str. 52/ 6: 2 've bought, did you get 3 took, 's lost 4 haven't taken, put 5 dropped, 's promised 6 hasn't come, disappeared

Danes bomo razmišljali in brali o ogroženih vrstah in o kampanji mlade američanke, ki poskuša spremeniti svet.

1. Which endangered species do you know? What are the dangers to the environment?
2. Besediše, ki ga morate poznati v povezavi z okoljem si zapišite v zvezke (naslov Environment):
 - endangered – ogrožen
 - rare – redek
 - protect - zaščititi
 - species – živalske ali rastlinske vrste
 - rainforest – deževni gozd
 - extinction – izumrtje
 - captive – v ujetništvu
3. Oglejte si posnetek: [10 Rare Endangered Species Soon To Be Extinct](#)
4. Preberite besedilo Take Action! v učbeniku na strani 76 – nekaj besed sem zapisala spodaj, če pa so še kakšne, ki jih ne poznate, jih poiščite s pomočjo slovarja:
 - passionately – strastno
 - child labour – delo otrok
 - poor conditions – slabi pogoji
 - cotton – bombaž
5. Kdor želi, si lahko prebere še kratek članek na to temo na naslednji strani.

That's it for today, we will continue with this text tomorrow. teacher Maja

2019 Was One of the Warmest, Says NASA

What is climate change?

- Climate change is the changing weather and rising temperature of the Earth.
- 2019 was a warm year with France, Germany and the UK having record temperatures.

2019 was a year when young people called for action on the climate. Now, two scientific groups say that it was part of the warmest decade on record.

The UK Met Office and NASA studied world temperatures. The Met Office studies weather in the UK; NASA is responsible for space exploration.

They said that the information they found showed that 2019 was one of the warmest years on record. Dr Colin Morice from the Met Office said: "2019 joins the other years from 2015 as the five warmest years on record".

So why is this happening? Scientists say it's down to climate change. Climate change is the changing weather and rising temperature of the Earth. Professor Tim Osborn said: "we know that human activities are causing the globe to warm". On its website, NASA says it's "likely to be the result of human activity".

The Met Office says that one of these human activities is the "increasing greenhouse gases in the atmosphere".

Greenhouse gases can enter the atmosphere through fossil fuels being burnt. Carbon dioxide is a greenhouse gas which traps heat and energy from the Sun. This has led to the world's temperature rising.

Some countries are taking action. The UK government says it wants to cut carbon emissions to zero by 2050. In June, ex-Prime

Minister Theresa May said it was time to "safeguard the environment".

Young people have called for action on climate change. Greta Thunberg became famous for skipping school to protest climate change. Her actions inspired others around the world.

In September, a global strike happened. Young people protested to call governments to do more on climate change.

Finlay Pringle, from Scotland, is another climate change activist. He told Twinkl that: "there's no Planet B" and that people must act.

Glossary

NASA National Aeronautics and Space Administration, in the USA.

fossil fuels A natural fuel, such as oil, coal or natural gas, found in fossils.

strike When people don't work to protest something.

activist Someone working to a specific aim.
